Subject: FW: Hunters Point Documents from NRC re their recent inspections of Tetra Tech
Attachments: Jurisdictional Determination letter.pdf; 2012 Inspection.pdf; 2011 Tetra Tech Inspection.pdf; EPA Response Letter.pdf; NRC HPS Involvement letter.pdf; Inspection Report Enclosure.pdf; Inspection Report.pdf

FYI, here are explanations of NRC's role at Hunters Pt Naval Shipyard and recent inspection reports of Tetra Tech. Roughly speaking NRC's role is to make sure that the service providers who are doing the field work are complying with the Navy's contract requirements. They cover part of the geographic area of the base and CDPH covers the remaining part. They coordinate with each other. The most recent inspection report summarizes the rad portal sensitivity setting protocol, which is what I emailed you yesterday. Richard's phone number is 301-415-5563.

Subject: Hunters Point Documents

Lily,

It was good talking to you on the phone. I wanted to provide some documents regarding the Hunters Point site.

Specifically, I have attached:

- NRC's letter discussing its proposed approach at Hunters Point and EPA's response.
- NRC's April 2014 inspection report of Tetra Tech at Hunters Point and a cover letter for the inspection report.
- NRC's 2012 and 2011 Tetra Tech Inspection Forms .
- A recent letter for service provider jurisdiction that was provided to the Navy. The State of California was provided a similar letter. Hardcopies of the letters were provided at the EPA/NRC annual meeting. Please let me know if you would like the maps as well.

As a follow-up, NRC's inspector for this site and myself would be available for a call with you next Wednesday or Thursday morning if you wanted to discuss any follow-up questions.

Thanks,
Richard Chang
